Huge Draw Expected For FUN Show & Auctions Major Rarities On Auction Block

Some discounting is to be found among several series this week causing the *CCDN* Coin Market Index to drop for the first time since July 30, 2004. Discounting is something that is usually expected just prior to a major coin show as dealers reposition their Bids. This year's FUN show and the large number of public auctions surrounding it will probably require a strong cash and credit position to be a successful participant. Silver Commemoratives are enjoying nice strength and activity with many issues advancing. Morgan Dollars are finding selective increases. Dealers are willing to push Bids higher for those specific dates that they are trying to find for their customers. For example, many collectors are eager to buy a 1904-S Dollar in MS64. Mint State Gold is lower this week, a reflection of the weaker Gold Spot that is now at $421 per ounce. However, notice that Type II $20 Liberties are higher in MS61 thru MS63 for NGC and PCGS examples. Type is showing some discounting for select areas but none of these declines appear to be too serious. Overall, the improvement of the sight-unseen market will depend on the continued demand for coins that is primarily being fueled by the many new collectors willing to explore the numismatic market.

The new year has begun with much optimism appearing in nearly all aspects of the rare coin market. Many dealers are excited about this year's prospects as they hope it will be a record year for themselves. We know that business has been brisk and the demand for coins is still strong. This can be measured by the comments offered to us about the market or just by the number of increasing Bids that are found throughout our sheets. Several dealers credit the strong precious metal's market over the last year for some of the sharply increasing Bids. Dealers tell us that when the metals are increasing, it opens the door to new coin collectors. However we know that the combination of factors, such as the Fifty State Quarter program and the new circulating Commemorative Nickels have also done their share to awaken people to an interesting and educational hobby. Of course others are very fond of the super profits that rare coins have been accumulating at a time when many other investments have not kept pace.

With all this said, it is easy to see why so many dealers are happily traveling towards southern Florida to attend the initial major rare coin show of the new year. The 2005 Florida United Numismatists show and auctions will be held in Fort Lauderdale, January 13-16. Expectations are running extremely high as some really spectacular coins and key dates have already been consigned to several auction companies. On January 9, Bowers and Merena will conduct the Rarities Sale featuring the James W. Lull and Excalibur collections. January 10, American Numismatic Rarities will host the Kennywood collection. Dealers will be extremely busy viewing lots and placing Bids but there is not much time to waste because the Fort Lauderdale 2005 Elite Coin Auction is scheduled on January 11 by Superior Galleries. Superior is featuring the Bermuda Trading Collection of Morgan Dollars. Some of better Morgans offered are: 1886-0 and 1887-O in PCGS MS64 DMPL; 1889-CC in PCGS MS64 Prooflike; 1893-O in PCGS MS66 Prooflike; 1893-S in PCGS MS64; 1895-O in PCGS MS64; and a colorful 1895 NGC PR68. A few additional highlights from that same sale include: a 1921 Satin Finish Peace Dollar in NGC PR64; a PCGS AU53 1808 Capped Draped Bust $2.50; an NGC PR65 Ultra Cameo 1879 Flowing Hair $4 Stella; and a 1910 NGC PR66 $20 Saint-Gaudens. Heritage will host the 50th Anniversary Signature auction of the Florida United Numismatists Convention January 12-15. A few highlights from the January 12 sale of the John C. Hugon collection of Barber coinage includes: an NGC MS68 1901-S Dime; a PCGS MS65 1896-S Quarter; a PCGS MS67 1901-S Quarter; and a PCGS MS68 1913-S Quarter. The Gold Rush collection on January 12 will offer several major Gold rarities: an NGC PR66 Cameo 1880 Coiled Hair $4 Stella; a PCGS MS66 1839/8 Type of 1838 Large Letter $10 Liberty; an NGC AU55 1787 Brasher Doubloon with EB punch on the eagle's Wing; and an NGC XF45 1787 Brasher Doubloon with the EB punch on the eagle's **Breast**.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XX No. 2 January 14, 2005 Single copy price $4.00

Brisk Activity Taking Place In Florida Breather For Sight-Unseen Market

Dealers have hit southern Florida in force hoping to be able to buy a few of the many rarities that will be offered in auction and on the bourse floor. The January 13-16 Florida United Numismatists show is the big draw as dealers try to reshuffle their inventories by selling off the coins that they have been holding for too long. However, dealers will mostly concentrate on buying fresh and interesting material for their clients back home. True key and semi-key dates that are rare across-the-board and not just "grade rarities" will receive most of the attention. The huge bourse and tremendous amount of auction lots being offered should provide something for everyone. Pre-show auctions have already demonstrated that Bidders are willing to pay "moon money" for quality material with original surfaces. Lackluster coins and those that are just average for the grade are beginning to sell for larger discounts.

The FUN show attraction and auctions have put a damper on the usual number of strong sight-unseen Bids seen posted on the electronic dealer trading networks. This sluggishness being experienced in the sight-unseen market is not unusual at the time of a big show and auction. Dealers need to be in a strong cash and credit position to accommodate their potential purchases and that often means that sight-unseen Bids will suffer. Discounting is also evident as dealers look to blow-out some stale material to raise funds. Areas that are usually doing very well with numerous Bid increases appear weaker, simply from the lack of activity. This is not the case in all areas as multiple buyers are still visible at current levels and slightly below. This lack of activity is especially noticeable within the Morgan Dollar series as only a few dealers are willing to post higher sight-unseen Bids. Generics and Carson City issues are just maintaining as are the countless better dates series. Commemoratives remain healthy with a handful of advancing issues and no minus signs. Mint State Type is displaying a number set backs, mostly for generic Gold as can be expected with Gold Spot trading lower. Dealers often have an easier time selling Type coins rather than dated rarities to raise funds quickly for auctions or upcoming deals. The balance of the sight-unseen market is exhibiting similar weakness as Bidding funds dry-up as this major Florida show takes over. Late date Walkers and select Proof Singles can also be counted among those areas not doing well. For the Walkers, it's a continuation of the weakness that this otherwise popular series experienced in December. However, it is also exciting to see that strong Bids are taking place among the early date Washington Quarters. Better date examples are alive this week with strong Bidding responsible for many 10 percent and better gains seen. The 1936-S jumped 50 percent to $150 Bid for an NGC MS65 example. Early Washington Quarters, especially the tough to find San Francisco Mint examples from the 1930s are experiencing strong demand. Dealers tell us that they know of many customers working on Quarter sets and it's the better early dates that they need.

The Fort Lauderdale 2005 Elite Coin Auction concluded on January 11. This sale was conducted by Superior Galleries and featured the Bermuda Trading Collection of Morgan Dollars. We know that Morgan Dollars have been among the hottest issues of 2004 and this auction presented dealers an opportunity to acquire a few for their customers. The classic pair of Brasher Doubloons brought over $5.4 million in the Heritage sale along with $1.035 million for a '94-S Barber Dime in PCGS PR65 and $207K for an 1893-S Morgan in PCGS MS64. The hectic pace at this year's Fort Lauderdale FUN show is expected to be sustained throughout. Dealers like to stay a few days after the show's conclusion to tie in a vacation as the majority of the country is till in the heart of winter's hold.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highes nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Sight-Unseen Market Weakens Halves Hit Hardest

Ironically, the sight-unseen market has taken quite a hit this week following a successful FUN show last week. The huge glut of auction lots that were sold during a seven day span in Fort Lauderdale, Florida has obviously taken its toll in some areas. More than $74 million in coins changed hands at public auction in Florida and the available money needed by dealers to secure these purchases had to come from somewhere. Consequently, dealers had to come up with credit and or cash quickly if they were to be successful in acquiring some material for their anxious clients. Many dealers began by lowering or removing some of their sight-unseen Bids to free-up their credit lines and not be overextended while away at the show. Next, they looked over their inventories and decided which coins to let go at a discount to raise cash quickly. Sometimes the decision making process is an easy one and sometimes it isn't. The material that is easily replaced will go first then the average material not receiving any interest from customers will go next. Of course this process takes place only after those coins that are below average or just down right "ugly" for the grade are jettisoned. But dealers are careful not to let their inventory levels get too low and miss those opportunities for sales. The bottom line for them remains the same, as they still need to buy the coins that remain on their customer want lists.

We see minus signs in many areas of the **sight-unseen** market this week. Common issues are declining as are those issues that can be replaced without too much difficulty. There are some exceptions! Silver Commemoratives held up remarkably well with no significant weakness seen. A Commem expert at FUN said, "Silver Commems are strong from grades MS65 thru MS67." He sees buyers looking for coins with attractive, original toning as well as nice brilliant white examples. He noted strong demand for Lafayette Dollars. Many dealers expressed the strength of the key and semi-key date market. These coins were hot at FUN and remain hot across the nation today. Dealers told us that Dollars dated 1879-CC, 1883-S, 1903-S, 1904-S and 1934-S were all experiencing exceptional demand. Of course this is also true among many popular series and denominations. Still, we also note that several select MS65 Morgans have been discounted. Type is a tremendous area of the market to tap when cash is needed. Naturally we see minus signs filtering in among Mint State, Proof and Gold Type this week. Grades from 64 and higher is where most of the declines can be found. However, Capped Bust Dimes, both Large and Small Size Type bucked the trend with a few increases in Mint State. We know that Gold Type is weak because Gold Spot is still under pressure. Some dealers told us that prices for common date Gold were a bit soft on the bourse and at auction. Still, it's a whole different ball game when you see the demand for rare date Gold today. Mercury Dimes and Buffalo Nickels have a few minus signs but the real story is found among Walking Liberty Half Dollars. It comes as no surprise that the **late date** issues of the series are still dropping but the degree of this week's decline is noteworthy. It appears that dealers have just chosen to let them go at whatever level they would find. MS65 and better Walkers were just dumped, primarily in the Heritage sales. Several high grade Walkers were sold for more than **50% below *CCDN* Bid**. It is also disturbing to see the sheer number of coins sold at public auction at levels **below** today's **sight-unseen** Bids. Franklin Half Dollars are also an area where this is taking place with coins selling at auction for as much as 30% below what dealers will pay **sight-unseen**. Dealers that were paying attention and bought these coins could quickly turn them over, some for a nifty profit. Proof Singles suffered as well with many examples declining from Cents thru Halves.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

Extremely Active January Ends Mixed
Generic Dollars Slide

January is coming to a close with the rare coin market experiencing mixed reviews. The first month of the new year has been an extremely active one with nearly 100 million dollars in rare coins changing hands at public auction alone. Add to that figure the wholesale and retail sales conducted by dealers and it is easy to see why so many dealers are bullish about the coin business. However, discounting is continuing to take place in many segments of the **sight-unseen** market this week following more than 180 declines seen last week. There are still segments of the market realizing solid demand and it is this underlying demand that is keeping the overall tenor of the market in the positive. It is also important to realize that nice profits could be had for those dealers willing to pay attention and act on what the market is giving them. There are over 150 sight-unseen Bids that are higher and sometimes considerably higher than some coins are selling for at auction. Active and volatile markets make this possibility a reality and dealers that grasp the opportunity will benefit for their efforts. Just take a look thru this week's market columns and you will see quite a few auction prices realized (*a*) that are **below** current sight-unseen Bids. Some examples include: 1936-S Bay Bridge NGC66 realized $144 while buyers are paying $380; 1924-S $1 PCGS63 realized $322 while buyers are paying $350; 1921-D $1 NGC65 realized $184 while buyers are paying $210; $5 Lib PCGS61 realized $173 while buyers are paying $250; $2½ Indian NGC63 realized $460 while buyers are paying $850; 1934 Buffalo Nickel NGC65 realized $92 while buyers are paying $250.

One must also consider the sheer number of rare coins that have been thrust on the marketplace this month. In years past many of these coins would have simply gone unsold, but amazingly, today we see a high percentage of them actually finding new homes. It is another sign that there truly has been an expansion in the collector base and that those new collectors are actively buying rare coins. Dealers are also among those winning lots at public auction. They have played an important role at these sales, both for their clients and for themselves. Dramatically shrinking inventory levels have led many dealers to lean on the panic button. Dealers know that you can't make money if you don't have enough fresh material to offer your customers. Consequently, they were actively trying to buy coins at auction and at the January shows from other dealers and collectors. This material is needed to propel their sales thru the usually active months of January thru March. These dealers also know that their auction bills will becoming due soon and they need to raise additional funds to cover them. The sight-unseen market is often the first line of defense against these bills and the areas of weakness seen in this week's sight-unseen market are not surprising.

Issues that are common or are reasonably easy to replace are the first ones sold. Look at the mixed action taking place in the Walking Liberty Half Dollar series. Strong Bid increases from five percent and greater are seen for many middle dates in the thirties and including 1940S. Serious collector demand for coins grading MS65 thru MS67 is fueling these increases. Conversely, the later dates thru 1947 grading MS65 and MS66 are continuing their slide with many issues experiencing **double digit** percentage declines. Late date Walkers continue to sell off while trying to establish a support level. Next notice the weakness among generic Morgan and Peace Dollars. These coins have increased nicely over the past 3 years and dealers are unhesitatingly blowing them out for cash. At the same time, we do see some increases for select better date MS63 and MS64 San Francisco Mint issues that generally range in value from $1,000 thru $5,000. Some increases are found chasing Proof Mercury Dimes although the gains are relatively small. Select Silver and Gold Commemoratives are another area where dealers have little concern about selling modestly priced issues. Remember, original brilliant white examples or attractively toned pieces in the higher Mint State grades continue to command strong prices. These are coins that remain near the top of want lists. Mint State and Proof Type are also areas that are prime candidates for quick sale. First, they can provide a higher dollar amount for the dealer, and secondly they can be relatively easy to replace. Seated Liberty Type coins are among those Mint State Type issues that are lower this week. MS61 thru MS63 Gold Type continues to be soft even though we have seen some positive movements with Spot bullion. Still, this volatile area provides dealers with quick cash and little concern about replacing. It is also another area that finds coins selling below current Bids. Easy money lost?

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – Trade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Silver & Gold Commems Sought-After Another Round Of Auctions Approaching

The sight-unseen market is somewhat active even though you don't see a record number of plus signs appearing. It's just that many rare coins are trading within a comfortable range and dealers are readily buying and selling at these levels. However, there are areas of the sight-unseen market that are extremely active with many increases taking place with regularity. Silver and Gold Commemoratives are a case in point. This week, increased Bids are appearing for Silver Commems graded by NGC, PCGS, ANACS and ICG. The current demand is widespread with many Bids jumping more than 2½ percent for the week. Gold Commems are also strong for coins grading MS64 and better. Proof Singles are hot as well with Proof Walking Liberty Half Dollars higher by 3 percent and more. Additionally, Mercury Dime and Walker Proofs jumped as much as 50 percent in some cases for select ANACS and ICG examples. As with Commems, dealers are just desperate for coins and they are widening their search by including more grading services. Morgan Dollars are relatively quiet although some interest is pushing MS63 and MS64 NGC generics slightly higher. ANACS Morgans are solid with the 1904-S MS63 Bid jumping a spectacular 92 percent. Key dates from just about all segments of the market are needed. For example, the Mercury Dime key, 1916-D, jumped 4.76 percent to $11,000 Bid in PCGS MS64FB. Mint State and Proof Type had a better week as well. Matte Proof Red and Brown Lincoln Cents climbed 9 percent in MS64 and MS65. The sight-unseen market has leveled off a bit from the rash of discounting that took place following the busy January auctions. Still there is some discounting taking place and opportunities lost for those not paying attention. Walking Liberty Halves remain under fire with some late dates dropping below previously seen levels. However, we don't see the mass sell-off that was evident prior to this week.

We do know that dealers are strictly seeking the coins that their customers are clamoring for while they look to sell those that are out of favor. Many of these dealers are also positioning themselves to accommodate this demand. There is no doubt that some will be rifling through their recent buys and sells trying to determine what their next move is going to be. The approaching Long Beach Coin and Collectibles Expo is playing a role in their thinking process. The February 23-26 show is usually among the most active and important major shows that dealers put on their must-do list. Many dealers that attend these shows are there primarily to buy coins first. Of course they also need to sell those coins that are stagnant and have been hanging around for just too long a period of time. They also like to take the opportunity to sell coins that can give them instant funds for buying additional rarities. Dealers are telling us that rarity ranks high among their needs. Key date coins in all grades seem to be gobbled up at shows even before the first day. Hungry dealers schedule earlier visits and usually buy these keys before many others have the chance. Still, when key dates are available on the bourse dealers are asking top dollar and amazingly, some are getting it. This also makes dealers less willing to part with examples that are in their inventory due to replacement concerns.

Several dealers will be coming to California a week or more earlier so they can participate in the two Pre-Long Beach auctions in Beverly Hills. Ira & Larry Goldberg Coin and Collectibles will offer the Pre-Long Beach Auction featuring the Michael M. Magdic Collection. It will be held February 20-23. Next, Superior Galleries will conduct a Pre-Long Beach Elite Coin Auction on February 20-22. We have listed a few certified highlights from each of these sales.

Sight-Unseen Market Stays Mixed Key Dates & Commems Shine

Bidding sight-unseen for coins and successfully buying them takes some work as dealers must check the current Bids and Asks along with having an understanding of the market's direction and breadth. This information could prove to be beneficial for those dealers looking to maximize their trading efforts with larger profits. When the market is very active and volatile, as it is right now, it is even more important to stay on top of things if one is to come out ahead. Consequently we still see several coins falling through the cracks and selling at public auction for levels **below** sight-unseen **Bid**. Sometimes the percentage difference and the price of the coin are too small to mess around with but other times the loss or gain for the buyer paying attention can be rather significant. Of course we also understand that each dealer must measure his or her own opportunity cost involved with this activity. If one's time is spread to thin, then we understand that the time would be better spent servicing customers and/or any other related business activity. We also are aware of the hectic pace that ensues this time of year. For many, their schedule includes the Long Beach Expo and auctions with the pre-Long Beach sales beginning February 20 in Beverly Hills. Time is limited and therefore very precious to dealers and so they must do the tasks that will benefit them the most.

The market has definitely softened in several areas leaving us with a mixed market as we head into the middle of February. Morgans have been less robust than we have grown accustomed to seeing with the "CC" issues rather quiet. We have especially noticed several "CC" dates being offered for only a few dollars over Bid. Generics remain soft although a slight increase is taking place for Morgans grading MS67. Peace Dollars are also on the soft side and continue to be quiet. Gold is another area of the market that has sustained a reversal of fortune. When Spot was jumping and bullion was hot, increased Bids were found all over our Gold Type pages. Not so today with Gold only trading in the $415-$420 range. Some dealers believe that grading standards for generic Gold Type and Dollars have been significantly loosened in recent months. One and two point upgrades have been made recently on material that was purchased in the past year. Mint State grades from 63 through 65 with that pleasing appearance are said to have the most potential at being upgraded. It will be interesting to see if the widespread sounds of cracking slabs from years past returns to the bourse floor, and what effect on the market this will cause. It is not all bad news for Gold Type, there is still selective strength for High Relief Saints in MS61, MS62 and MS64. Also, Type 3 $20 Liberty issues in MS66 and MS67 are very strong with MS67 Superb Gems at $25,000 Bid, a 28 percent gain for NGC or PCGS. Mint State and Proof Type remain quiet and mixed, as some minus signs reflect the overall market. Late date Walkers continue to be lackluster with a few more minus signs appearing. Some increases for PR66 and PR67 Mercury Dimes highlight an otherwise soft Proof Singles market.

Clearly, selectivity prevails these days and if you are fortunate enough to have the rare coins that are in strong demand then you will probably have a super west coast show. For example, we see extraordinary demand continuing to blossom for key dates of all series. Check out the **astronomical** jumps in this week's Mercury Dime Denver minted key. NGC and PCGS 1916-D Dimes have jumped an amazing 75 and 85 percent respectively for the coveted MS64 grade, a condition nearing gem quality. Strong increases are also appearing for examples grading MS64FB, MS65, MS65FB, MS66 and MS67. Dealers need this key and even with the jump Bids, as of this writing, they have been unsuccessful. They are not only willing to pay this strong money but will gladly buy any quantity as well. See the chart below for a comparison of Bids and populations from the last market peak to today. The $2.50 Indian 1911-D, another key, is also making some noise with MS63 examples higher at $12,000 Bid for either NGC or PCGS. Unfortunately not all dealers have inventories of the "in demand" coins. So if your inventory is laden with late date Walkers, common date Morgans, MS61-65 Gold Type and late date Mercury Dimes to name a few, then it could be several long, Long Beach afternoons. We know that most dealers will be looking to buy at the Long Beach show and there are expectations that buyers will be aggressively pursuing the better date coins and this competitive spirit is usually strongest during the first part of the show.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UNPRECEDENTED SEVEN-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual®*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

NCS brings a collection up out of the ashes

We are delighted with your conservation service. You turned melted, plastic blobs back into very desirable, high quality coins, and did so with amazing speed and at a reasonable cost. We highly recommend NCS to anyone who is in need of your services.

Al Adams
Gold Rush Gallery

In Mid-2004, a devastating fire nearly destroyed most of a private collection of rare U.S. coins valued at close to $100,000. Fortunately, the experts at NCS conserved most of this important collection, salvaging high-quality coins from almost unrecognizable rubble.

Whether your needs are this severe or more conventional, you can trust our extreme dedication to numismatic conservation.

Sight-Unseen Bids Jump For Scarce Saints Heavy Trading Expected Early In Long Beach

As expected, the sight-unseen market is less active this week, as is usually the case when major shows and public auctions are upon us. There are not as many plus and minus signs to report but rest assured that strong demand for coins remains evident.

Key dates are one of those areas of the market that has been advancing for the past couple of years. However, some dealers have begun to notice a change. They believe the keys are experiencing some stabilization now that they have risen to levels more appropriately suited to their rarity. Still, they do admit that keys continue to readily sell at the current stronger levels. Of course exceptions to these observations are out there and especially so with the 1916-D Mercury Dime. Therefore notice the increase this week, sight-unseen, for this rarity in MS67 for both NGC and PCGS. Remember that this increase in MS67 follows last week's huge move in several grades, including MS67. Better date $20 Saints are commanding the attention of dealers. Sight-unseen Bids are jumping as dealers battle one another tenaciously for a few dates they believe to be very undervalued. The 1908S, 1909D, and 1914 are the primary targets. They are sought-after in a number of Mint State grades and dealers are willing to pay strong percentage increases over Bid to get them. On dealer recently returned over 13,500 inserts from "cracked-out" slabs to PCGS. This has resulted in decreases in the population report and is certainly contributing to some of the increased Bids for better Saints. Softness is the word for MS65 Mint State Gold Type. Several denominations are participating with minus signs, including: Type II and III Gold Dollars, $2½ Liberties, $3 Princesses and $20 Liberties. Franklin Half Dollars are also suffering from a wave of declines. Quite a few Franklins have sold at auction in the past month for levels far below what dealers will pay sight-unseen, in some cases by as much as 43% below Bid. Commemoratives are continuing to advance as they have for quite some time now. Dealers need these coins and in some cases are willing to buy raw coins and those graded by ANACS and ICG in addition to PCGS and NGC. The demand is not very selective as most grades are being heavily targeted up to MS63. Collectors like to buy the scarcer Silver Commemoratives in Mint State condition. Some of the rarer Commems increasing this week include: the 1928 Hawaiian, the 1936 Albany, 1935 Hudson and the 1900 Lafayette Dollar. The Morgan Dollar series as a whole is generally stable at current levels. There is still a lot of support for better date Dollars but we aren't seeing the profusion of plus signs that we were receiving on a regular basis. Also, we are noticing that generic examples are becoming more available in quantity at levels between Bid and Ask. These bargain lots are open only to those that are willing to take multiples of the same date in mixed grades in a combination of PCGS and NGC holders. Mint State & Proof Type, Buffalo Nickels, Mercury Dimes, Walking Liberty Half Dollars and Proof Singles are all in a holding pattern. Interest for these coins are stable but no one is increasing the ante to get them prior to the public auctions and Expo.

The general coin market has begun to firm a little bit after the slight sell-off of some material to primarily pay for auction bills. One dealer from the South said that "the overall market is very healthy." The strength that he, and others see in this market stems from the continued demand that dealers continue to receive from their customers. This base remains solid. These buyers are patiently waiting for select coins that appear on customer want lists. These lists will be carried by many dealers heading west to attend the Pre-Long Beach auctions and Long Beach Expo. The auctions begin February 20 and the show gets underway February 24. Often, dealers are most active in the initial hours of the show trying to get a jump on their competition. They are eager to be the first to check out and to make offers on any new and neat material being shown on the bourse. Activity at the auctions as with the show is expected to be highly competitive for select areas of the market.

Probably the most important of all the key dates, the "King of American Coins," the 1804 Draped Bust Dollar is in the news this week. Numismatic Guaranty Corporation has announced that it has graded and encapsulated the famous Garrett specimen. It is now graded NGC PR55, a Class III restrike from the mid-19th century and is one of only six examples known to exist. In other news, Teletrade, the pioneering Internet Auction company celebrated its 2,000th sale on February 13. The company was founded in 1986.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Surge In Small Gold
Pair Of Pre-Expo Auctions Total $12 Million

Gold Type is leading the market this week with a large number of higher sight-unseen Bids. Interest for Gold is increasing and dealers are trying their best to accommodate this rejuvenated demand. Most Gold denominations are participating with some experiencing strong percentage increases. The immediate need appears heaviest for small size Gold, including: $2½ Indians & Liberties; $3 Gold; and $5 Indians. Buyers are primarily targeting Mint State grades from 61 thru 64. Gold Commemoratives are also participating with higher Bids in MS61 and MS62. Silver Commems remain solid again this week with many plus signs appearing throughout with a concentration of Bids focusing on MS63 and MS64 examples. Type I Standing Liberty Quarters are jumping a bit in MS61 thru MS63. The 1917 Type I is a must for those putting together Type sets and it is obviously far more affordable than the 1916. Still, there is some discounting occurring as outstanding auction bills continue to come due. Some coins must be sold to pay the bills. Dealers are selling off select Morgan Dollars, Mint State & Proof Type, late date Walking Liberty Half Dollars and few Proof Singles at lower levels.

Dealers began the Long Beach Expo with strong expectations that trading, initially, would be heavy and they weren't disappointed. Activity was brisk with the majority of dealers already in attendance on set-up day February 23. Dealers were busy setting up their display cases while at the same time trying to conduct business. Coins were being bought and sold at a rapid pace as dealers were trying to get a jump on the competition by completing early deals. Gold coins were especially in demand and doing well in early trading. Dealers were buying and selling just about anything Gold from Type and Bullion thru the better dates and shipwreck examples. There seems to be tremendous demand for Gold in all grades at the moment. One dealer commented that, "Gold is active." He said that Gold is selling at strong wholesale levels on the bourse especially when the coins are attractive for the grade. However, he did express some concerns about his ability to accommodate all the demands of his business. He was busy setting-up, looking at coins to buy while at the same time contemplating selling prices of his inventory. So much to do. He said that there's not enough man hours in the day to get all this stuff done. It is important to keep in mind that all of this intense activity is a sign of a healthy rare coin market, as the Long Beach bourse will attest. Dealers told us that the Morgan Dollar market is still very good despite some recent minus signs. Interest is evident for many better date examples especially those within the $2,500-$3,500 price range. This amount is one that collectors feel very comfortable with when buying. Some of the dates that are needed include: 1886-S-1889-S; 1890; 1891; 1892; 1893; 1896-S and 1904-S. These dated Morgans are selling easily, even at premium asking prices. Silver Commemoratives are another area of the market that continues to prosper. Yet it is the "high-end" Commems that dealers are quietly trying to buy. They are especially looking for MS65 and better examples for their established clientele. Activity is greatest for Commems that are the better date examples for the Type and those that have strong eye appeal.

The Pre-Long Beach Auctions brought very strong results. Superior's sale held Feb 20-22 realized $4.5 million while the Ira and Larry Goldberg C&C auction held Feb 20-23 brought $7.4 million. We have listed some certified highlights from each sale.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied [illegible] that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (month old); "t" – Trade during the most recent month; "lm" – Lowest asking price appearing last month; "lt" Trade appearing last month; "**ot**" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

NCS brings a collection up out of the ashes

We are delighted with your conservation service. You turned melted, plastic blobs back into very desirable, high quality coins, and did so with amazing speed and at a reasonable cost. We highly recommend NCS to anyone who is in need of your services.

Al Adams
Gold Rush Gallery

In Mid-2004, a devastating fire nearly destroyed most of a private collection of rare U.S. coins valued at close to $100,000. Fortunately, the experts at NCS conserved most of this important collection, salvaging high-quality coins from almost unrecognizable rubble.

Whether your needs are this severe or more conventional, you can trust our extreme dedication to numismatic conservation.

CERTIFIED COIN DEALER newsletter

Gold Dominates Sight-Unseen Market Baltimore Show & Auctions Next-Up

The sight-unseen market is quite turbulent with interest taking place in many series. The increase in activity is directly related to the huge number of auction lots that hit the market. Dealers tell us that auction bills are still outstanding and so they need to sell some more material to fulfill their payment obligations. Consequently discounting has certainly been evident in the sight-unseen market again this week. Select Morgan Dollars, Proof & Mint State Type, late date Walkers along with some Proof Singles have all suffered declines. Many coins have sold below, some far below, current sight-unseen Bids leaving money on the table. Obviously some astute buyers are smiling today. Of course it is important to point out that these market negatives in no way mean that the bull ride is over. That's because the general feeling about the rare coin market expressed by dealers at the recently completed Long Beach Expo was one of optimism. Dealers are happy with the sustained current demand for rare coins and satisfied with the solid collector base. They believe that the balance of 2005 appears to be bullish as long as buyers stay active and credit remains available. The increase in the number of auction lots available each month is simply a by-product of the market strength yielding higher prices.

The surge that we observed in Small Gold in last week's sight-unseen market has carried over this week and more. Strength in the Mint State Gold Type market is evident as Bids push higher. Gold Spot has shown some sign of pulling out of its recent, comfortable trading range but many feel that most collectors are just happy to see it stay above $400. Interest for Gold Type is seen with new collectors starting out by buying a single specimen and over time some will look to obtain quantity. The $3 Gold Princess has drawn quite a bit of interest with buyers wanting MS61 thru MS65 graded examples. This odd denomination has captured the attention of many collectors for its beauty and rarity. Commemoratives remain hot! We have noticed the interest and demand levels for Commems rise even before the Expo. Now that Long Beach is behind us, clearly the need for Commems is great. One dealer told us that he sold nearly $75,000 (retail) worth of Silver Commemoratives in the first hour of the first day of the show. Despite all the auction lots that have been sold, dealers still need to buy select Commems for their customers. Some areas of strength seen this week includes: the Hawaiian; Hudson; Isabella Quarter; Lafayette Dollar; Spanish Trail and the Oregon Trail. Gold Commems are even hotter with plus signs appearing in all Mint State grades and covering virtually all issues. The Capped & Draped Bust Half Dollars are pushing higher in Mint State Type. The early Bust series has seen extraordinary demand by collectors, and dealers are simply trying to fill this need.

Dealers have hardly had any time to rest following the Expo. First, they need to process their buys and sells in California and ship coins to their customers. They also need to view auction lots in preparation for the busy week ahead that finds auctions scheduled for each day. Of course the Baltimore Coin & Currency Convention March 11-13 is next in Maryland. The Baltimore auctions begin March 7 with David Lawrence Rare Coins featuring Part III of the Richmond Collection. The Richard Jewell Collection March 8-9 will be offered by American Numismatic Rarities. Bowers and Merena will conduct the March 2005 Baltimore Auction featuring the James W. Lull Collection, Part Two March 10-11. We have listed a few certified highlights from these sales.

CERTIFIED COIN DEALER newsletter

Strong Sight-Unseen Bidding For Gold Attitudes Bullish In Baltimore

The sight-unseen market continues to accentuate the special needs of coins in favor as well as to depict, with minus signs, those areas that are more expendable. Dealers need to have a sufficient amount of resources available, on any given day, to be successful. Some periods require more funds than others and recent auctions have drained their wallets. Consequently discounting has been evident in past weeks as dealers sell a few coins to cover bills coming due. The sight-unseen market is also quieter this week because of the Baltimore auctions and show. Still, we see areas that are in demand and Bids are pushing them higher even this week. Gold Type is enjoying strong Bidding activity. Increases are taking place in many denominations and grades. The $3 Princess, Quarter Eagles and Half Eagles are all participating. Of course, Spot climbing back to $440 per ounce doesn't hurt either. Early Gold has been realizing accelerated prices at auction and on the bourse. Increasing sight-unseen Bids are rather rare but it demonstrates the extreme need by dealers and the willingness to find the coins using any means possible. Respectable increases are occurring for NGC and PCGS $10 Draped Bust, Small Eagle examples in multiple grades. Keep in mind that a few of these are six-figure, sight-unseen Bids. Similarly, we are also receiving six-figure Bids for $4 Flowing Hair Stellas. The increases occurring today are on top of the already nice gains seen by this popular, but odd Gold denomination. Silver Commemoratives have been hot. Dealers have orders and they are trying to buy examples to fill these orders. If they can't find the material immediately and they don't have time to play the auction game then they post higher sight-unseen Bids. This, they hope, should do the trick. The coins needed appear to be the bread-and-butter items. They are not too high priced or too high in grade but they are in demand. Some examples include: an MS61 Lafayette Dollar; an MS63 Isabella Quarter; Gettysburg in MS61 thru MS64; and an Iowa in MS65. Weakness, and some discounting, is again targeting the late date Walkers and some Proof Singles.

The definitive characteristic of today's rare coin market is that collectors are in command. Why is this important? Dealers know that collectors are the end consumer of coins and as such, the collector base provides strong price support. Today's baby boomer buyers are pursuing their interest by buying select dates for their collections. They are also systematically upgrading their sets when the opportunity presents itself. In a large part the thanks for this demand is given to the birth of the set-registry. Still, this collector base is more sophisticated than we have known in past bull markets. They have the advantage of obtaining more expert books on each subject along with an easy access to current population reports. This knowledge, along with professional third-party grading and certification, has helped them to fearlessly buy coins at stronger prices. Keep in mind that this affluent collector base feels more comfortable about putting money out for coins especially when their alternative investment options are performing so poorly. Consequently dealers believe the strong prices being realized at public auction will probably continue as long as the current financial atmosphere remains in place. An added boost to the overall market has been received from another crowd. Many younger people are also actively seeking coins today. These buyers are readily adding each new State Quarter as it becomes available. These young collectors are as important to the future growth of collecting as we see the baby boomer generation is to today's expansion. The increase in the number of Modern Commemoratives, new designs for our regular coinage and Paper Money has helped to provide an explosion of media attention to the subject. Add to this a splash of record prices for select rarities, like the NGC PR66 1894-S Barber Dime realizing $1.32 million in the March 7 David Lawrence Rare Coin Auction of Part III of the Richmond collection in Baltimore, and it is easy to see why dealers are so bullish. And it is this bullish attitude that they are expressing now in Baltimore at the Spring Coin and Currency Convention.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's but command some premium over non-P/L strikes.

CERTIFIED COIN DEALER newsletter

Gold Still Rules Sight-Unseen Market
Ultra High Relief $20 Brings $488,750 In New York

The sight-unseen market is continuing to display the selective segments that buyers are focusing on today. Those areas of the market that are in favor are easy to spot via higher Bids while the less popular areas, like Franklin Half Dollars, are seeing some discounting. Gold is still facing tremendous demand today as was very evident in Baltimore and throughout the country last week. Spot, climbing its way back up has lured many buyers back to the table. The scope of this golden demand has been tremendous. Both the sight-seen and the sight-unseen markets are enjoying strong Bids for just about any flavor of Gold. Early Gold, Proof Gold, Mint State Type Gold and Dated Gold have all become highly sought-after. Dealers are trying to buy all that they can just to keep up with the increasing number of outstanding orders. This week's higher sight-unseen Bids for $20 Saint-Gaudens depict this amazing demand. We see that both common and rare dates are pushing higher. Some of the increases are rather astounding. Check out the key, 1921, with MS62 graded examples jumping 50 percent since our last report. Obviously dealers are trying to shake some of these rarities out of hiding. Several other issues among the Saints are also displaying strong percentage increases this week. Silver Commemoratives remain in serious demand, placing a close second to Gold. Interest for this area of the market favors the lower Mint State grades but the need, like Gold, is still great.

The Baltimore Spring Coin & Currency Convention along with an auction marathon lasting five days has left dealers exhausted, as well as encouraged and exhilarated. Business remains active after Baltimore and this is especially seen at public auction. The results of this activity have made more believers. Dealers believe that the bull market remains in force with strong prospects for a continuation of the same expected for the balance of the year. Demand for **collector** coins is running at an extremely high level with buyers willing to pay strong, sometimes unbelievable sums of money for the select dates that they need for collections. Many record prices have been seen this year in nearly all areas of the market. Interest in building complete, quality sets has become a primary goal for collectors. Often, these collectors are striving for the finest quality, hoping to add their names among the registry for that series. Orders for this type of material continue to pour in. Still, it's the dealer's job to locate, buy and offer their customers the examples they seek. Dealers have maintained many a collector want lists and it is often the public auction venue that provides them the opportunity to acquire select dates. March has offered them many opportunities and so dealers spent long hours reviewing lots and long nights at the sales trying to capture some items for their customers. Competition is growing, causing prices to jump and dealers need to act accordingly. Consequently they must review their Bidding strategy with their clients before proceeding. Success is the goal. However, when the coin is finally placed, even at a higher level than anticipated, the collector is usually very happy with his or her new addition.

Dealers moved from the busy Baltimore auction venue to New York City for the $12.1 million sales conducted by Stack's. The Buffalo and Erie Historical Society and the Laurence H. Gardner Collections were held March 15. The Morrison Family and Lawrence C. Licht collections followed on March 15-16. Rare coins that had been off the market for many years brought enthusiastic demand and aggressive prices. Certification wasn't even a thought when most of these coins were initially acquired. It will be interesting to see which holders these coins go into and what grades they are given. We have listed some of the many highlights from these sales.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highe nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks o Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

Gold & Silver Commems Attract Strong Bids
Expensive Gold Coins Sought-After

Precious metals seem to have taken a hit this past week but we haven't seen the same weakness being reflected in Type Gold. Generic Gold has been pushing the sight-unseen market to higher ground for several weeks now, going back to late February and despite the current bullion woes we still see additional increases this week. Demand is keeping Gold Type among the strongest portions of today's rare coin market. Dealers continue to report that they have new and outstanding orders for Gold. Some are buying common dates to upgrade their Type sets while others are buying early, rare date Liberty, Indian and Saint-Gaudens issues. Those collectors trying to buy **early** Gold know that it takes more than just a lot of money to ensure success. It also takes patience, knowledge and the expertise of one or more dealers who specialize in this particular area of the market. Several of these specialists are currently trying to fill a number of aggressive want lists that include some tough varieties and scarce dates not often seen. Proof Gold is another area that is continuing to see higher sight-unseen Bids and the attention of serious collectors. This week NGC and PCGS certified $4 Flowing Hair Stellas are enjoying increases for PR63 and PR64 examples. The increases are 13.33 percent and 5.71 percent respectively. This may not sound all that impressive unless you understand that these gems have already moved higher just two weeks ago. Also, we are looking at five- and six-figure rare coins that jumped $10,000 and $6,000 respectively. Stellas have already done remarkably well these past couple of years as deep pocket collector/investors gravitate towards higher priced material. Another high-priced rarity enjoying an impressive 15.65 percent gain is the $20 Saint-Gaudens High Relief. This week, NGC and PCGS examples grading MS62 are facing serious demand and higher sight-unseen Bids. As with the $4 Stella, High-Relief Saints have also posted impressive results over the past couple of years. What will be the next big-ticket Gold coins that these deep pocket collectors will ask for? Or will dealers beat them to it by promoting, $3 Princesses, $50 Pan-Pacific Gold Commems or Type Two $20 Libs?

The demand for Gold remains strong but it still must place second to the demand targeting Silver and Gold Commemoratives. Aggressively higher sight-unseen Bids are in place for a wide range of Silver Commem issues, mostly at the **lower** end of the Mint State grading scale. Dealers have been incrementally raising Bids for Silver Commems without much success for quite some time now. So far in March, only Alabama and Iowa are reported to have traded sight-unseen thru the Certified Coin Exchange, amounting to 10 coins total. Larger Bid jumps are needed to acquire material in a timely manner, for example the scarce and very popular 1939 Arkansas PDS set is now 45 percent higher in MS61. Gold Commems are also scoring impressive gains as well. Again, like Silver Commems, it is the low end of the Mint State category that's needed with MS61 and MS62 highly sought-after. The 1905 Lewis & Clark $1 Gold Commem in MS61 tops the list at $1,020 Bid translating into a 20 percent gain for both NGC and PCGS examples. Classic Gold and Silver Commems are generally scarce in the lower Mint State grades and it appears that many of these issues are now being perceived as undervalued at their present levels.

Activity is seen among a couple Proof Type issues. Matte Proof Lincoln Cents and Liberty Seated Halves, with Motto are higher in several grades. Dealers have increased their sight-unseen Bids for this material because they believe that these coins are bargains at these levels. It also doesn't hurt that collectors are waiting for them. Some sight-unseen trades that took place this week on the electronic dealer trading networks include: an NGC PR67 Barber Half Dollar at $4,500; an NGC MS66 1934-D Walking Liberty Half Dollar for $2,300; a PCGS MS64 1853 Liberty Seated Quarter, Arrows & Rays at $2,900; and an NGC MS67 1888 Morgan Dollar for $4,580. Some discounting is occurring among Mint State Type but overall, the balance of the sight-unseen market, including Morgan Dollars is relatively stable. Many dealers will be heading to California to attend the Santa Clara Expo March 31-April 3. Superior Galleries will conduct the Santa Clara Elite Coin Auction in conjunction with the show.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" - Lowest asking price during the week prior to publication (week old); "**m**" - Lowest asking price during the previous three weeks (*m*onth old); "**t**" - *T*rade during the most recent month; "**lm**" - Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

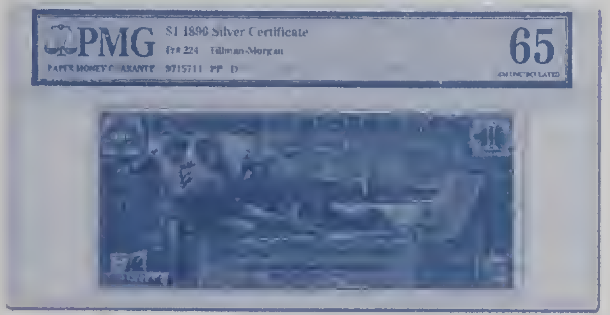
INTRODUCING

PMG

PAPER MONEY GUARANTY

DELIVERING SECURITY AND TRUTH TO THE WORLD OF PAPER MONEY.

Certification. Standardization. Protection.



Professional and impartial paper money grading and encapsulation gives you a collecting environment that is stable, liquid and free of fraud.

Paper Money Guaranty (PMG), the newest independent member of the Certified Collectibles Group (CCG), combines accurate, impartial and knowledgeable graders with proven processes and standards for the care and evaluation of your notes.

Many of these standards have been established for years at our sister company, Numismatic Guaranty Corporation (NGC), the largest, most respected company in the authentication and grading of rare coins. And, as with coins, each of our paper money experts is prohibited from buying and selling notes to ensure impartiality.

Most importantly, behind it all is the passion and respect for the hobby that we bring to work with us each and every day.

CERTIFIED COIN DEALER newsletter

Silver & Gold Commems Are Hot
1916-D Mercury Dimes Find Ready Bidders

The sight-unseen market is a more specialized market than is the sight-seen. Dealers put their trust in the certified holder's opinion while placing his or her sight-unseen Bids accordingly. Any qualifying statement as to toning, attractiveness, not too ugly, white coins preferred or other such requirement does not fit the realm of the sight-unseen market. Those dealers buying rare coins, sight-unseen, are pleased with the ease and ability to buy or sell coins quickly. Bargains are also found in this activity. This week, Silver Commemoratives are receiving a tremendous number of higher Bids translating into a wealth of plus signs. This area of numismatics has been on fire, in both the sight-seen and sight-unseen markets. These coins are popular and many examples have remained in high quality, just as they were when they left the Mint. That's because these coins weren't placed in circulation but rather admired and saved with care by the owners that cherished their historical keep-sake. The strong demand for Silver Commems is trying to capture those few Commems that were not as well preserved by their owners. They are looking to buy the lower Mint State grades of MS61-MS63, but they also are offering strong money for select MS64 and better examples as well. Gold Commems are also entertaining strong demand. The fervor for Gold Commems is even more powerful than for Silver with all Mint State grades participating. Both NGC and PCGS are benefiting from this Commem demand. Check out some of the sight-unseen Bid increases for select **NCI** coins. One astute dealer is looking to capitalize on these forgotten slabs by aggressively Bidding for select Commems, Dollars and Walkers that, when finally re-holdered, may pay him off handsomely. Strength is also found in the Mercury Dime series with the key date, 1916-D, increasing in several grades. Weakness has returned to the late date Walkers with a rash of minus signs appearing this week. Morgan Dollars are very quiet as is Mint State Type. According to one dealer, Morgan Dollars "have reached a point of saturation." The number of increasing Bids has dropped and prices have leveled along with some declines. Proof Type is suffering some discounting and so is some generic Mint State Gold. However there are some bright spots, such as $5 Indians, and other MS65 Gold showing plus signs. Some may ask whether or not these fluctuations are normal. Those individuals should remember that all markets simply react to demand and supply at any given point in time.

The rare coin market does not move in one block, either up or down, contrary to what some people were starting to believe. There are areas that are strong with increasing Bids challenging owners of the same to cash in their coins. However, there is also some discounting taking place as dealers look to dump out of those coins that have become stagnant or out of favor at the moment. Still, most dealers that we talk with on a regular basis agree that the market remains bullish as we begin April. Where is the demand targeting today and which areas seem to be in a drought? Many of today's collectors are chasing after quality coins that also have some degree of rarity. Dealers tell us that generic Gold is somewhat weak right now but the same isn't true for Gold Commemoratives or better date $20 Saint-Gaudens, for example. We also hear that scarce $5 and $10 Indian Gold is also being snapped-up by collectors. These Gold rarities, among others, are high on the want list of many collectors. Consequently they are important items to inventory. Dealers try to inventory those coins that are relatively popular, and that have a wide following. However, rare date Gold is a difficult item for dealers to stock because of its price and availability. Dealers find the road to acquire these kinds of coins to be a rather rough one. They usually find themselves locked in an auction battle with other dealers and serious collectors. This strong Bidding activity makes the proposed acquisition tentative at best. This is why many are unable to compete in this top end market. Still, the extreme demand and ready sales of said material may make them reconsider.

"I'm So Sure You'll Love Teletrade's® Auctions That I'll Give You $100 Just To Try One!"

–Paul I. Song, Teletrade Vice President

Paul Song

"My co-workers told me I was crazy to offer every *Coin Dealer Newsletter* reader a FREE $100 discount on one Teletrade invoice over $500 for purchases made in the month of April, 2005. But I'm so sure that you'll love Teletrade's certified coin auctions that I'm willing to chance their ridicule!"

"My name is Paul Song and I'm absolutely positive that you'll love Teletrade's unique way of doing business. Thousands of active dealers, collectors, investors, accumulators and estate executives participate in our auctions week after week. They love Teletrade's three weekly sales, our periodic specialty auctions, and our easy to use web site."

"Teletrade conducts three auctions every week of the year, which close at 10 p.m. every Sunday, Monday and Wednesday. Bidding takes place on the Internet or on a toll-free telephone line, so you can participate from your home or on the road."

"We also hold three specialty auctions: 1) Teletrade's monthly Premier Sales feature the finest and rarest of coins; 2) Our monthly Contemporary Classics Sales offer the finest known examples of many coins from the 1930's to the present; 3) Our third specialty auction, a real favorite with collectors and investors, is the quarterly Rainbow Sale, featuring toned and rainbow-hued U.S. coins."

Here's My Free $100 Discount Offer

"Here's my offer: visit Teletrade's web site – www.teletrade.com – and register. It only takes about two minutes. Then click on "Mr. Wantlist" and enter the list of coins you want. That should take another minute or two. Finally, select one of our upcoming sales and see how easy it is to view each lot and, if you're interested, to bid."

"Remember to clip out the $100 Discount Coupon below, and use it to help pay for any Teletrade invoice over $500 dated between April 1 and April 30, 2005. Clip it today and get a nice discount when you find the coins you need."

Sight-Unseen Market Remains Active Commems & Early Gold Lead The Way

The sight-unseen market seems to be gaining strength in early April. This is a good sign for those already in attendance in Kansas City for the ANA National Money Show. Dealers are actively trying to buy select coins for strong money, both on the bourse and on the electronic dealer trading networks. Interest is specialized as not all segments of the market are participating. Silver and Gold Commemoratives are displaying a large number of Bid increases. Many of the increases are rather small but it still points to the direction and interest in this very popular area of numismatics. The emphasis of this Silver Commem demand is mostly for coins that are priced under $1,000. These are coins that are very affordable and salable. Gold Commems are favored by a more affluent collector and so the increases are seen for more expensive examples across-the-board. Surprise, Walking Liberty Half Dollars are generating some **plus** signs this week. It's the middle dates from 1934-40 that are grabbing the attention of Bidders. Both NGC and PCGS are in demand and dealers are looking for quality examples grading MS65 or better. The 1936-D and 1938-D in MS67 are up $250 each, now Bid $5,500 and $5,250 respectively. Proof Type is receiving active Bidding for Flying Eagle Cents. The PR61 thru PR63 grades are the target with both NGC and PCGS examples needed. We even see Morgan Dollars enjoying selective demand. A few **better** date MS63 and MS64 "S" and "O" Mints are higher. Gold Type is another area that seems to be defining the selectivity that's taking place throughout the market. We see that the $3 Princess is moving higher in several Mint State grades. This odd Gold denomination is a favorite among collectors. However other Gold denominations, except for $5 Indians are rather soft.

Early Gold is definitely a specialty area of the market and one that's just beginning to come into its own. Prudent dealers have recognized, for some time now, that this area of the market offers coins that represent an excellent value. Consequently they have been educating their clients about the opportunity that's before them. Of course early Gold is not readily available as these coins were not struck in the quantities of say, common date $20 Liberty or Saint-Gaudens. Also, dealers tell us that for many of their new clients it's an educational process, learn as you go if you will. These individuals are actually working their way backwards. First they have learned about rare coins via the State Quarters and quickly graduated to the early, better date Washington Quarters. Next it's the Standing Liberty Quarters and so it goes. By the time they become seasoned collectors they will actively be seeking some of numismatics' treasures such as our initial Gold coinage. Dealers know that they are in for a real battle when trying to buy these coins for their inventories or their customers. They also know that they need to participate in public auction and/or via private treatise on the bourse from other dealers to buy some examples. However they are finding that the asking price, more often then not, is usually at very high levels. Those lucky dealers that have some in inventory demand top dollar, and often because of the rarity and lack of availability, and coupled with today's strong demand they are generously rewarded with a profitable sale. Consequently a few savvy dealers are going by way of the sight-unseen market. In some cases, their sight-unseen Bids are very close to their sight-seen Bids. They realize that these coins are undervalued and they are not afraid to buy them at these attractive sight-unseen levels.

Is there money for the taking? We still see that a few rare coins are falling through the cracks. These coins are selling, at auction, below current sight-unseen Bids. There are opportunities for those dealers willing to pay attention to details and it makes sense because some may already be attending the sale in person anyway. For example at a recent auction, an NGC MS62 Type I $1 Gold realized $230 that included the 15 percent buyer's fee. Sight-unseen Bid for this coin is $300; that's 23 percent below the market and a nifty quick profit for an astute buyer.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Strong Bids Ring True For Full Bell Line Franklins
Market Softens But Dealers Remain Optimistic

Last week we wrote that the sight-unseen market was active. This week it is even more active and the number of Bid increases is even more pronounced. However the market is still very selective as discounting is appearing with some of the decreases being rather strong. Still, the lack of fresh material at the Kansas City ANA's National Money Show left dealers little choice but to head back to the electronic dealer networks. They weren't able to satisfy their inventory replenishment needs and/or collector want list demand and so they still need to buy more coins. The increases that are continuing this week in the sight-unseen market are a reflection of that need.

Dealers seemed satisfied with the overall rare coin market at the ANA although many agreed that the market is softer than they have seen earlier in the year. This weakness is somewhat expected from a market that has just gotten a bit ahead of itself. We know that even bull markets need to step back so they can digest some of the new price levels. Wholesale transactions were still the strongest portion of the show for many in attendance. However, some of them did admit that they have become all too familiar with each other's inventory and they were just hoping to find some new stuff. Consequently, their less than glowing show impressions were predicated towards the lack of fresh material. Despite this negative, dealers are optimistic about the May 5-8 Central States Numismatic Society show that's up next in St. Louis. They also believe in this market and are encouraged by the strong demand that's targeting select areas.

Look who answered the bell this week. Full Bell Line Franklin Half Dollars are realizing some astounding percentage increases. Interest for MS64FBL Franklins is exploding with sharply higher sight-unseen Bids in place for several dates within this series. The huge price spread from MS64FBL to MS65FBL may have played a role in the thinking process. Once again, we are seeing a myriad of plus signs covering the Commemorative Bid columns of both Gold and Silver. Interest is still running high as collectors are anxiously waiting for coins to add to their collections. Dealers are hoping that this round of increases will bare enough fruit to satisfy at least a portion of that demand. Surprise, it looks as if the Morgan Dollar series is crashing out of its doldrums with significant increases of its own for a host of semi-key and key dates in MS63 and MS64. Dealers have told us that they know of many collectors working on completing sets. These collectors are just waiting to get their hands on some of these better dates. We even see some plus signs for Carson City issues again. However generic Dollars in grades thru MS65 are still lackluster. Check out the excitement in Peace Dollars as several issues are now higher. Strong increases in the Dollar series is a welcome sign for the overall market.

Type is an area of the market that is receiving mixed reviews. Dealers are quick to buy Type that they can carefully examine however they are also willing to blow-out some Type in an effort to gain liquidity. A high-grade Buffalo Nickel set that sold at a recent auction has caused several declines. Mint State Gold is another one of the weaker areas of the market. Gold bullion hasn't exactly been any cause for excitement and so this is what you would expect from the Gold Type market. However, that being said, the $3 Indian Princess and Type II $20 Liberties are the exceptions. Increases in both these denominations are directly related to availability. Everyone knows that even the most common $3 Indian is scarce compared to other Gold denominations. Also, treasure hoards recovered from shipwrecks of years ago have produced a quantity of Type I $20 Gold rarities. Think about the *SS Central America, SS Brother Jonathan* and the *SS Republic*, all boasting high grade Type I examples. Therefore it isn't a surprise to see increases for MS62 and MS63 **Type II** $20 Libs, especially when you consider the cost jump of MS64 and better examples. Finally, the late date Walking Liberty Half Dollar action may best sum up the overall market selectivity with both plus and minus signs appearing.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

UNPRECEDENTED SEVEN-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual®*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

CONTAINS ALL-NEW INFORMATION ON:

- **Gold coins as an economic safe haven**
- Coin conservation services
- **Coin insurance and safekeeping in light of September 11, 2001**
- The latest Internet strategies
- **Digital photography pointers**

and much, much more!

Levels Hold After April Gains
$5 Indians & 1893-S Morgans Jump

The last few weeks have been quite active in the sight-unseen market with higher levels reported in every edition. We have already monitored more than 2,700 increases so far this April with a little more than 300 declines. The majority of higher Bids have been placed for Classic Silver and Gold Commemoratives although nearly all segments are participating. Strong demand is chasing after rare coins from a number of different denominations and Types, all pointing to the sign of a healthy market. Where is the demand coming from and how long will it last? Dealers are constantly telling us that their inventory levels have been severely depleted. They need to buy coins to correct this situation but they also need coins to fill the want list demands of their customers as well. The collector base has been experiencing a slow, but steady expansion throughout this bull market run. The Fifty State Quarter program seems to add to this demand as each new State Quarter is unveiled. This allows a new group of people from their state to participate and learn about coins. Also, the creation of the registry set has done wonders to stimulate numismatics and allow further growth via collector competition and pride. The continued weakness taking place in the stock market has also contributed to an increase in demand for rare coins. Will this trend continue? No one knows for sure but many numismatic analysts believe that 2005 will remain strong for rare coins. This has definitely been proven to be true through April anyway.

Cash flow is an important consideration for dealers because they need to be able to take advantage of any hot deals or special opportunities that may arise. In the coin business, opportunities often come when you least expect it. However, the reality is that bills are always coming due and they need to be paid. One dealer told us that some of those bills may be from the coins purchased at public auction from almost **three months** ago. We know that auction companies try to accommodate some of their customers by allowing them additional time to pay for coins won. Now, as these auction bills are here some dealers must come up with the cash or try to get an extension. Many times a dealer will just choose to sell some stock that has become stagnant. These coins are quickly offered in the sight-unseen market or via private treatise for immediate funds. So some of this week's discounting may be occurring because of those reasons. In any event, discounting is seen among Mint State Type, Gold Type, Silver Commems and a few Walking Liberty Half Dollars. Still, there are some interesting positive Bids out there that should be noted. The Morgan Dollar key, 1893-S is posting nine percent or better increases for MS61 thru MS63. These gains are for both NGC and PCGS encapsulated coins. Any serious collector working on a Mint State Morgan Dollar set needs this date. Dealers can only increase the Bid and hope some might turn-up. We also see a higher sight-unseen Bid of $3,300 for the better Carson City date 1879-CC in MS62. Carson City demand that has stumbled over the past couple of months has now begun to strengthen again. Activity is continually growing within Peace Dollars and this week it's the MS65 grade displaying plus signs. Buyers of generic Walkers have returned, inching Bids up to $35 for MS64s and $85 for those certified as MS65. **Huge** percentage jumps are seen for high grade $5 Indians with MS65s up 28% and 32% respectively for NGC and PCGS. In MS66 the gains are 26% and 16% respectively. So even though this week has been relatively sparse for plus signs, the selective nature of the market is still very evident with strong increases.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, affiliate coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher, presenting this data, has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee or benefit that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related prices in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

"The NGC Registry operates the way a collector collects—focusing on the quality and beauty of the coins themselves, and not the holders."

— Bob Moreno

Bob Moreno
Occupation: Insurance; Horse Breeding
Collects: Buffalo Nickels, Standing Liberty Quarters,
Walking Liberty Halves, Peace Silver Dollars

For Bob Moreno, it was a passion that started at age 8, when his grandfather introduced him to stamp collecting. He was soon drawn to coins, collecting them with an appreciation and fervor which continues to this day.

Though he collects a number of coin sets, Bob takes particular pride in his award-winning Walking Liberty Halves and his Peace Dollar Proofs, 4 out of 5 of which are finest known specimens. Rare in any condition, these breathtaking coins were acquired with the assistance of Bob's professional numismatist, Barry Stuppler. View these unique treasures, and share Bob's passion for collecting at **www.NGCcoin.com/passion**.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)

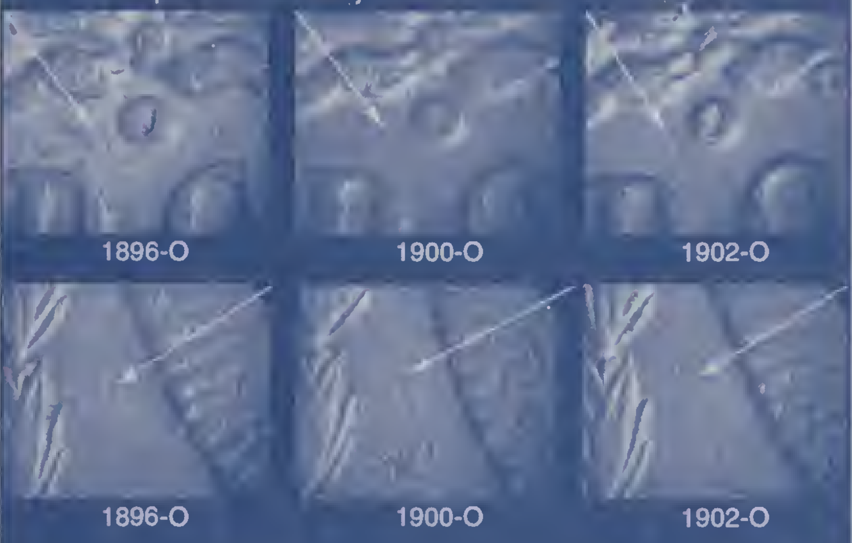
Vol. XX No. 17 April 29, 2005 Single copy price $4.00

Affordable Collector Coins Sought
Micro "O" Morgans Deemed Counterfeit

The lack of many changes, again this week, shouldn't be mistaken for lack of demand. Dealers need coins and that has been their declaration throughout 2005. The sight-unseen market is in a holding pattern with most posted Bids remaining at their current levels. Some discounting is present, as well as some increases but overall things are quiet compared to March and early April.

One dealer told us that he is surprised by the sheer lack of coins available to buy at shows, especially those that are in an average price range for his customers. This includes Silver Commemoratives in affordable collector grades up to MS64, which have been steadily climbing higher for quite some time now. This is a popular area of the market because buyers enjoy collecting the fifty different designs that make up the series. One dealer told us that his average collector client, representing approximately 95 percent of his customer base, is looking to buy Silver Commems that range in value from $200-$1,500. Unfortunately, this dealer and many others are loosing sales because their depleted inventory is lacking these type of coins. In need of a quick remedy, Bids are being raised and bourse floors, both large and small are being scoured to buy this stuff. The recent Kansas City ANA Money Show held a lot of promise but for many came up short. Consequently this demand still needs to be satisfied and dealers will be hoping for better luck at this year's Central States Numismatic Society Spring Convention in Saint Louis, Missouri. This major May 6-8 rare coin show preceded by PNG day on May 5 has already received high expectations and promise from many dealers who plan on being in attendance. For Commemorative specialists, it means another chance at satisfying the needs of customers. They will be looking for nice white Commems including: Long Island, Lynchburg, Albany and Missouri in grades up to MS64. These are coins that should be readily available but unfortunately for dealers who are ready to buy they're not. This scenario, similar to many segments of the market, has been the cause of much frustration for dealers and their customers.

Depression in field just southwest of the mintmark



Matching linear depressions found between the wreath and left wing of the eagle and left of the mintmark are identical on each of the three dates. Depressions such as these are not the result of circulation or marks from other coins, but are the result of raised lumps on the die. These lumps are created in the transfer process when making a counterfeit die from a genuine coin.

The Morgan Dollar market has, arguably, one of the largest base of collectors going. Dealers tell us that they have many customers working on building one, or more aspects of this series. We have seen, this year, how the Carson City Dollars have been the object of serious demand and price increases. Now, they seem to have settled back a bit off those highs and have found a more comfortable trading range. Most dealers watch the Morgan Dollar activity as a barometer for what's happening in the overall rare coin market. So when Dollar news becomes available it is received more seriously than we may see if it appeared in another series. So with this in mind it has been determined by PCGS that the Micro "O" variety of New Orleans Morgan Dollars dated 1896, 1900 and 1902 are actually "deceptive, contemporary counterfeits." An "unusually high number" of examples sent to PCGS for authentication and grading may have tipped off graders to take a closer look, resulting in the conclusion that these coins were **not** the product of the New Orleans Mint. The Micro "O" Dollars dated 1896, 1900 and 1902 all share a common reverse from the exact same die, which is beyond unusual. The PCGS has certified 95 contemporary counterfeit Micro "O" examples, including: 26 dated 1896; 31 dated 1900; and 38 dated 1902. These deceptive coins, slabbed by PCGS, can be returned to the company for a refund of their current market value under the terms of the PCGS grading guarantee.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Commem Catapult Continues The Hunt Is On At CSNS Show

Last week we alluded to there being a lack of plus signs throughout many areas of the market that we monitor. We also said that it shouldn't be mistaken for a lack of market strength because there was still a lot of supporting Bids and optimism present. This week seems to justify those sentiments as you can plainly see. This is especially true if you look at our Silver Commemorative pages. These plus signs are even more significant considering that they are occurring during a week when many dealers are on the road. The demand is so strong that several third party grading services are receiving higher sight-unseen Bids including: PCGS, NGC, ANACS, ICG and NCI. Remember, this is also a very busy time of the year as shows and auctions are actively taking place. Most dealers that work the show circuit are already in Saint Louis participating in the popular Central States Numismatic Society Convention preceded by PNG Day. This major show seems to attract many serious collectors along with a number of dealers, both large and small. This year's venue in Saint Louis should be especially inviting as it is geographically surrounded by a rich source of collectors. For dealers, it is another in a line of shows and auctions that they hope will be successful. Dealers are trying to get a handle on their inventory woes and they hope to do just that in Saint Louis. These inventory levels have been depleted because of the strong demand from buyers and because of the limited supply that is available for replacement purchases. They are hoping to find some fresh material that meets the specific requirements of their customer want lists. Their client base has become increasingly more selective in their rare coin needs today.

The sight-unseen market, as we have already stated is getting more active. Silver Commemoratives are once again flushed with plus signs this week. The demand for Commems has been outstanding for nearly all of 2005. Dealers know that these issues are popular and they also know that they represent good value. Collectors like them because of their many designs but also because the price differences between the grades are not as severe as other segments of the market. If a buyer gets stuck with an over graded example the downside is relatively small. The lower Mint State grades from 61 thru 64 continue to dominate the Bidding activity. Several of these issues can be bought for under $1,000 per coin with most designs available for well below $500 each. Another sign that the market is strengthening comes from the Morgan Dollar Bid columns. Several small increases have occurred for PCGS and NGC Carson City Dollars in MS61, MS62 and some in MS63. Carson City issues are favorites of collectors and as such, a sort of market barometer. Dealers have also raised ICG sight-unseen Bids in a number of areas, but most predominately for Morgan Dollars. Several higher Bids are also found among Mint State and Proof Type. Late date Buffalo Nickels, Walking Liberty Half Dollars and some Proof Singles are also increasing. Take a look at the wide-spread demand for certified 1955 Proof Franklin Half Dollars in grades PR63 thru PR66.

CGA

Currency Grading and Authentication

CGA has been formed in response to demand from collectors and dealers for an impartial third party grading service, dedicated to serving the needs of the paper money collectibles industry.

Our goal is to tailor our services to the demands of the market. To educate the public about this exciting collecting field, and enable dealers to reach out to collectors who otherwise would have trepidation in purchasing uncertified bank notes.

CGA... the Original and First Currency Grading Service

When Jay Parrino purchased the Binion hoard of 100 $10,000 bills (one million face value) he had them graded at CGA. When the worlds most valuable note ($1,000 Watermelon F-379b) came to market, CGA was entrusted with authentication and grading. When a local coin shop purchased several $1 silver Certificates (F-237) recently, CGA was awarded the opportunity to grade them.

Whether your notes are worth millions or just pocket change, CGA has the experience, the expertise and the consistency to help market your inventory or collection. CGA brings liquidity to the market place with superb third-party grading.

In a few short years, CGA has graded and been entrusted with over $250 million dollars worth of collectable US Currency.

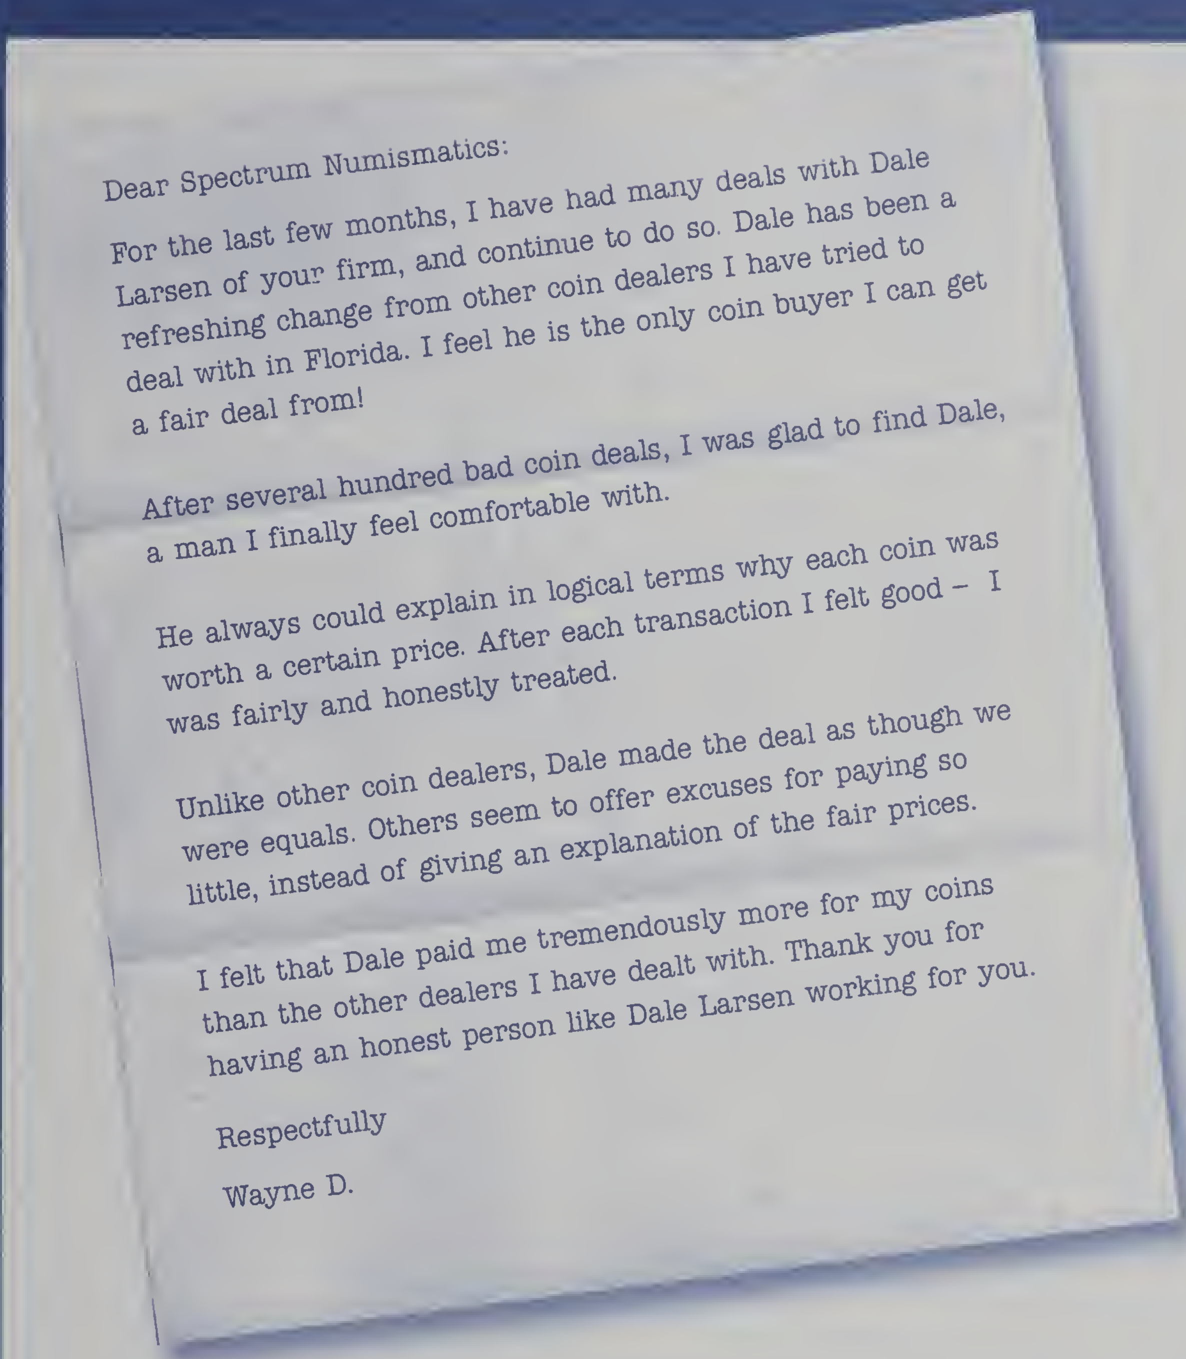
A Refreshing Change From Other Coin Dealers!

"Dale paid me tremendously more for my coins!"



Dear Spectrum Numismatics:

For the last few months, I have had many deals with Dale Larsen of your firm, and continue to do so. Dale has been a refreshing change from other coin dealers I have tried to deal with in Florida. I feel he is the only coin buyer I can get a fair deal from!

After several hundred bad coin deals, I was glad to find Dale, a man I finally feel comfortable with.

He always could explain in logical terms why each coin was worth a certain price. After each transaction I felt good – I was fairly and honestly treated.

Unlike other coin dealers, Dale made the deal as though we were equals. Others seem to offer excuses for paying so little, instead of giving an explanation of the fair prices.

I felt that Dale paid me tremendously more for my coins than the other dealers I have dealt with. Thank you for having an honest person like Dale Larsen working for you.

Respectfully

Wayne D.

__Dale Larsen__ is a coin collector turned rare coin dealer. "I've walked a lot of miles in the collector's shoes and I know how he or she likes to be treated," Larsen says. His specialty is coins with "great eye appeal" and he "loves dealing with the public."
